Alien Energetic Parasitic Life Forms Removal

These destructive life forms:

- Live on our life force energy
- Cause problems with physical health
- Contribute immeasurably to the aging process
- Embed active negative programming within the physical body of human beings

Experience Samples of Parasitic Life Form Removals:

Below are some of the Insidious Life Forms that have been Discovered and Removed

Invisible energetic life forms that puncture and live on peoples skin, allowing darkness to gain entrance into the body temple, including ticks, fleas, scorpions, mosquitoes, leeches, wasps, hornets, and more.

Energetic parasites that specifically attack and live inside the head including maggots and medusa-type worm nests that harbor in the brain and skull, scarabs that block our 3rd eye, barnacles that affect our physical eyesight, spiders, and more.

Alien Energetic invisible parasites that burrow in and around the internal organs and those that harm the immune system, including centipedes in the lymph system, leeches that live on our livers, black widow spiders, octopus, squid energy, and others.

The parasitic jellyfish that interface between our bodies genetic cellular memory and many Darkside mind control programs. These jellyfish bring forward past genetic programming that allow all other ALIEN parasitic life forms to be activated in us, often at preprogrammed times.

Alien parasites that specifically affect bones, joints, and muscles, including snakes and worms that tunnel through and around the skeleton, caterpillars in the joints, inharmonious color frequencies that invade the bone marrow, artificial intelligence that block light energy from entering the bone cells and make bones brittle, burrowers and biters that attack our muscles, and more.
